-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4, 8, 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lowery (6,543,390) in view of Fujinaga (5,813,369). Lowery discloses an animal harness comprising a tail strap (15) which passes above the tail of the animal; a leg strap (25) which passes below the anus of the animal, wherein a pair of leg loops are joined to the leg strap to encircle an upper thigh portion; a back strap (73) being joined to the tail strap which is joined to the leg strap; a chest strap joined to the back strap; and fasteners (62,63) joining the back and tail straps. Lowery, however, does not show a pair of back straps, or that the back straps are joined to the leg straps directly. Fujinaga teaches an animal harness comprising a tail strap (3) which passes above the tail of the animal; straps (6) which pass below the anus of the animal; and a pair of back straps (17) which are joined to the afore mentioned straps, and attach to the chest strap adjacent a shoulder region. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide that the harness of Lowery have a pair of back straps which join the tail and leg straps as shown by Fujinaga in

order to provide a more stable and comfortable attachment of the harness to the animal.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hang-Fu (5,386,802) in view of Lowery. Hang-Fu shows an animal harness comprising a tail strap (46) which passes above the tail of the animal; a leg strap (32) which passes below the anus of the animal; a pair of back straps (31) being joined to the tail strap which is joined to the leg strap. Although Hang-Fu discloses that a variety of arrangements of straps and harness can be employed, a chest strap is not shown, nor are the back straps joined to the leg strap. To extend the back straps of Hang-Fu such that they attach to the leg straps would have been an obvious modification in order to secure the positioning of the contact member (12) to the animal. Additionally, Lowery teaches a harness having a chest strap which is a notoriously well known feature of animal harnesses used to secure the device to the animal.

Allowable Subject Matter

4. Claims 16-28 are allowed.
5. Claims 5-7, 9, 10, 12-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
